

Dear Man and Woman of Britain

In this speech called “One Day Soon”, I will present my message for you as my plea to come together as a nation in those dramatic moments of our history .

Your hopes are teaching me how to become a strong leader as I cometh and I said what the country needed to be done when no one listened to my people with their grievances and sorrows but also with the hope that one day shall cometh and all these will be forgotten.

Our girls and our children shall not be forgotten and we shall not rest or find any excuse not until justice will be served for all and to all of them with no excuse, disregard, exception nor discrimination. The same as many must go also many must get behind the bars and face the true justice of the People of Britain, England, Scotland, Wales , Ulster and Ireland.

England will never die. This is the land of the Anglo-Saxons, The Celts, and all of the Aborigen Original Europeans who are still alive and for them it is time to get back our history as these are our lands of our ancestors, their forests where they hunt, their fields where they worked, their pastures where they walked their cattle and sheep, their places where they traded. Britain is their land they fought for every inch and Britain and Europe is our land where every Brit and European died to keep and defend. In those places of battle we have erected Holy Churches, Hospitals and Schools, beautiful cities and factories. In every of these stands the work, blood and sweat and life sacrifice of your fathers , forefathers and generations of your ancestors.

You should be the true owners of all these but not by political statement nor electoral promise but by law and constitution with a deed of ownership and legal rights defended by a new popular institution. The Institutional Monarchy versus the current model of it.

This is my proposal for all of you. I Daniel I'm your servant that you every man and woman of Britain shall employ. Not for the person but for

my ideas and intentions, of establishing a Popular Constitution that I've imagined, worked and wrote for you all. I haven't taken anything from you nor given you much, I will always advocate for your rights in your own land as this is the law that shall be for every land and for every people in their own land. As those who took from you they took from me too. Now we want it all back, we want our countries, our resources, our children and women unashamed and safe, and our cities back and clean and ordered as they were and our way of life. This is our Freedom.

I'm here by mission and choice as each of my Ancestors held their swords and fought against Islam for more than six hundred years to keep their land free , the Holy Cross on top of their Churches and since then no Mosque has ever been built there.

Britain will be Free when every Mosque will be torn down and no Mosque will ever be built in Britain and I Daniel The First I will be as Your Servant the first who I will give my first edict "To outlaw Islam and to declare any Islamic organisation and establishment as the enemies of this people and of this Realm."

Whoever stands against us and holds citizenship of this realm will be stripped. All false citizenships will be stripped and all establishments of occupation of our lands will be evicted and demolished. The English, Scots, Welsh and Irish will be free.

Shall we join only the fairer Treaty between truly independent countries politically and economically.

We will build something far greater, the country for all Englishman and English Woman and for the all Native Scotsman and Woman, for all Welshman and Woman and Irishman and Woman regardless if they want to join us or not but the name of the new Jerusalem for People on Earth it will be ***The British-English-Saxon Empire*** the unity of all of a Kind, Name and Language of every man and woman of same Motherland who all speaks the same language, bear the same names, forefathers, Christian faith and way of life.

England is where all English are, from the Motherland up to Australia, Canada, New Zealand, Guernsey, Jersey and other territories. A Greater England united in Christ, same language, genealogy and ties with Motherland will be stronger, respected, richer and more prosperous. The true identity of this country and Europe before the Roman invasions were made of Celtic tribes and Highlanders, Picts in Britain and Gauls. Germanic tribes as Teutons , Saxons , Vikings and others, Dacians and all of the old tribes of Europe they haven't surrendered in two thousand years or so and our fight for Freedom continued throughout the Holy Crusades, Mongols, Islamic invasions of Arabs and Ottomans and now we should gather again against the Globalist Invasions of Islamic terrorism and Islamic grooming against our women and children, against the continuous expansion of globalism and imperialism brought by diversity and inclusion that excludes the most our kind or the original white Christian European and White English, Anglo-Saxon, Celtic, and old European aborigens.

One night I had a nightmare I was living a life that wasn't mine, I wasn't poor but I was starving, I wasn't lazy but I was working and at the end of the day I was called names and shamed that I do not contribute enough and I saw the lands and forests of my forefathers chopped down, the beautiful towns of our ancestors torn down and I've asked the people what happened here but no one knew the answer because no one was speaking my language.

A lady in my dream just told me "Remember who you are." And I saw, how my ancestors fought 600 years to keep the Islam away from Europe and your ancestors have sailed the seas, have built this world we know, they built engines to rest the horses and feed the world, have given the Bill of Rights, Human rights and we have all benefited and we ended living up to seventy or eighty years and not thirty five. This is my speech and my gratitude that I wisheth to return for your goodness of your heart, as now great danger is coming upon us and army of brave men of Britain and whole Europe shall gather as the Black flag of Islam raiseth

again the flag of famine, destruction, oppression, enslavement and poverty.

We should rise again to defend our lands and the earth should tremble when all men and women shout their rights and freedoms, their right to be here as they were first and not even God can take this from you.

This is my voice, as now I'm a man with very few and fixed ideas and one is my war alone against everybody, against the beast of the Apocalypse with its seven heads, the Islam, Globalists, Communists, EU, LGBTQ, Antifa, and the Seventh is who's holding all six together ; is the Mass Migration.

Now I'm glad I'm not alone as this is our fight and for generations to come. God will lay his Crown to its new People, a good hearted charitable, and peaceful people to the English, Scottish, British and Irish to all these hard working man and woman and law abiding Christians who gave to the world their fair play, laws, human rights and spirit of freedom and those will now rise into the new Jerusalem on Earth as God's first elected people now is fallen in disgrace as paedophiles, child murderers and liars of God's laws.

God is now searching the second God's chosen people. This is the British people. This is now our destiny and our Cross we need to carry on our shoulders for our children and now shall pull the sword of Christ and defend our lands and our women and children.

The earth will tremble when the voices of the Englishman, Scotsman, Welsh and Irish will affirm their rights as this is your land and these are my people now.

As you can hear this Speech is about English and England. I will never advocate any other cause nor other countries other than English People and England.

This is because I claim one throne that's vacant and still empty. The Throne of England where nobody sits on it as The United Kingdom of Great Britain cancelled the Magna Carta and its most important clause : the clause 61 of security that ensures the safety pin of the people and

ultimately protects them when they find themselves alone against everybody in their own country.

My proposal lies in the practical demand of our times. This is not a political statement as you had so many of these in the past. No political statement can change anything as long it's not enacted as the Law.

This is what we're doing here: we rewrite the history of our country and our times.

Fellow Patriots Man and Woman of England and Britain I want to say going in a march or protest won't change a thing. They're glad you go. This prevents people from taking the right actions against them.

For instance gathering people and signatures for a Referendum in order to have a Written Constitution with fixed rules that are mandatory for any Government is what the Government doesn't tell anyone and why's that? Because this is what harms them the most ; is when people find about the "Rights they actually have " versus every of the establishment's narrative that tries to conceal this to the people.

A Written Constitution in the proposed version is the actualisation of the Spirit of Magna Carta . The work I propose to you is called " The Popular Constitution of England " and it has one hundred eleven Articles, where Article one hundred eleven is proposing that you also the People of England and Britain you can add as many other articles you need if you feel that my version does not cover the entirety of your problems.

The New Written Constitution would legally defend and institute, White Natives Rights of ownership upon your ancestral land. Will institute ownership upon your tax money . Will defend your Rights against any action of any Government against you.

Now this would actually do something against them all. Actions like Brexit Referendum and the Supreme Court ruling " that a woman is biologically a woman " these types of actions and proposals are the true nightmare for the establishment .

Why's that ? Because these types of actions are cancelling their legitimacy and are limiting their actions against the people and on top of that makes their life harder and they need to work more.

Imagine the sheer power of masses and the weight of legal and political argument carried into a Popular Manifesto for a Written Constitution. It will impose the new rules of the game for them too. Because this is the true Democracy.

Petitioning for a Referendum is not illegal . The true nightmare for them in this case is the “ spread of the ideas “ . The New Written Constitution would legally impose to them to abide, defend and institute, the White Natives Rights of ownership upon their ancestral land. Will institute ownership upon your tax money . Will defend your Rights against any action of any Government against you. Any other actions like diversity and inclusion will be deemed unlawful.

They cannot stop this. For this you don't even need to go out on the streets. But also , don't go voting for any of them either , moreover don't do anything for them anymore. Let them gain their legitimacy from a minority of ten percent , maybe from all the number of voters and then you`ll see what they can do and how they can impose anything that you don`t want. Once we have managed to vote the New Constitution via an organised referendum no one of them can do whatever they want and this episode of our dark history we will never repeat again because won't be possible. It will be unlawful to be called names in your own land , it will be unlawful to impose other cultures by force against Native people`s will, it will be unlawful and considered theft of your money to give your hard earned tax money to other people who haven`t contributed . All this will be made by Law and by You and not by means of any Electoral Promise that no one kept anyways.

What can they do ? When people are uniting in great numbers what can they do? They can bully , jail , intimidate like one or two maybe up to forty-fifty or so but what if they're thousands, hundreds of thousands maybe millions? What can they do? Can they imprison an entire

country? Can they issue fines to an entire country? They'll run out of paper before doing so...

Let's take this example . All White English while still majoritarian once they show up on huge numbers forming a bigger threshold than the numbers which any Government has been put in power will automatically disband that Government. Legally they won't be able to Govern. This is the help I need from you all. Discuss this amongst yourselves, spread this message and the Constitution . Spread as many copies as you can as this will protect me because they know that they cannot stop it. Even these ones within the system will tell their bosses to fuck off and they'll join the Revolution and embrace the change. They`re saying that we are sembling division. I will say to all of you that if you do not have division you'll end up having conflict . We must stop the conflict and ensure the future of our Kind , the ones who built these lands , who built Britain and to ones who are the true legitimate inheritors of Britain.

England is the propriety of English that even God cannot take this of them. I will always advocate for England to be truly Independent Politically and Economically with a White Majority.

British-English-Saxon Empire is proposing a new Treaty of brothers and sisters sitting to the Round Table of this New Treaty between free and independent nations that made the British-English-Saxon Empire with Britain the Motherland made of Engaland as well with Alba, Caledonia and Scotland, Cymru, Kernow & Manx, Ulster and Eire where England is Everywhere the English lives it is as well is in Australia, Canada, New Zealand, Guernsey, Jersey, Falkland and all other Crown`s territories.

This will be the New Jerusalem for the New God's chosen people. The English and the British will live united into a powerful and united country, a Christian Realm who'll rule the world again.

One day someone who`s not from here told me you`re not from here too so why do you defend them ? I told them, I am for them more than you all are nothing to them . I will tell you this country belongs to the

ones who built it. If the Will of my People is to want me here in this country is just a fair trade to show them what I have built for them or what my true plans are for their benefit first and foremost.

If my people would want me this is only my people's choice. If they don't then these are not my people. The ones who come and ravaged this country and have inflicted so much pain, suffering and humiliation these are not people here or anywhere.

England and Britain are your land and you are my people now.

As the day arrived , of a fair retribution and all bills settled . As The Bill of Rights we must continue pursuing our freedom.

There's no Freedom in Poverty as there's no power in the minority.

The law is for the many for the poor and the ones who have been here before any other than the Rights should be for them too.

Dear Man and Woman of England, I'm here to represent you and your interests as citizens and tax payers by the powers given to me by you all.

As the Head of State I should be the Head of Civil Service as I will hold only Constitutional Powers you have voted for via a National Referendum.

These Powers are composed in one hundred eleven Articles of the Popular Constitution each article is a fundamental Right of yours and my future Duty to Defend it including foreseeing if any Elected Government had implemented and embedded these principles correctly. Also on the same " Main Body of the Constitution" and you can add other Articles as well in accordance with your new proposals in a democratic way via a Referendum . This will hold the New Social Contract to Unify and Pacify our Realm as we have loads of work to do in raising our country again. The future efforts must be focused around Reconstruction and Progress of our Realm as we are left behind economically and technologically as we need to achieve a stable society and the stability must be political, social and economical to create the right environment for true development that country needs as we have been stagnant for more than

half of century now and we must be prepared for the battle for the 21st century.

Recent events and dramatic shifts in our recent history showed us the necessity of why do we need a modern Constitution to update the Bill of Rights and Magna Carta to the standards of contemporary and post-modern society. Recent interpretations of the law have repeatedly narrowed and altered the meaning of basic, fundamental citizen rights. Acts of Parliament, while influential, lack inherent legality as the country's primary law because they are not politically independent, impartial, or universally applicable to all citizens.

A written Constitution should serve as the fundamental law of the land, the source from which all universal values flow into a country's laws and regulations. Its spirit must prioritise the interests of citizens, the national good, and the cultural and ethnic preservation of the inheritance of native population, ensuring benefits for the many while safeguarding the country's political, economic, and national independence. It must protect all citizens -even against their own government—because a nation is defined by its past, its heritage, its present, and the future of generations who deserve at least the same opportunities as we have today, if not more. A Constitution exists to unequivocally guarantee and defend the country's autonomy, citizens' rights, and the rule of law.

Currently, nations like the United Kingdom, Saudi Arabia, and China operate with non-codified constitutions, lacking a single, unified body of law or a universal legal framework. In the UK, most people poorly understand Acts of Parliament and their own rights. Some Acts contradict earlier ones, revealing political interference, and the greatest paradox is that no Act can be fully repealed. This creates one of the world's costliest political systems, riddled with contradictions. For example, the most common and widely known dichotomy of the "breach of the peace" law—originally designed in the 17th century to curb nuisance from self-appointed authorities causing harm while preventing

crime—now baffles us. Its origins and practical use barely align with our modern cultural understanding of society. Recently, we’ve seen blunders and frustration as police wield “breach of the peace” in civil disputes involving utility companies, bailiffs, and others—a common example among many outdated laws that make little sense today.

True Reform must begin with these fundamentals, the basic tools of political decision-making. A unified, written Constitution—adaptable via referendum—would provide clarity. Its benefits would include future political stability, a more transparent legislative process, and a truly impartial, independent justice system. This stability would signal sustainable economic growth, laying the groundwork for social harmony and prosperity in Britain.

I will further say this to you: I'm not born in England but "I'm Made in England". This project: named the Popular Constitution of England and The Written Constitution of Britain has been made here , written here and made for you to answer your problems . This is my proposal to you. My first proposal is for England but it will continue to address the same for Scotland and Wales and decide later about Ulster and Ireland. This will be the subject of a second speech .

Now the necessity of this proposal and why the debate is compulsory is because there's one phenomena that even the oldest and first Political Parliament established in Modern Society couldn't escape. We are talking about its internal dissolution when a party or a group will start and will succeed to take power from inside. Internal "coup d'etat " when a group of political influence are taking the power from inside, hijacking the purpose of the Parliament, stumbling the laws in their favour and their voters or donors are diverting public money towards contracts of their friends and donors or family members and themselves.

Isn't this familiar to you? Isn't this the main feature of so-called Third World Countries?

Where the Governments do not act in favour of any majority but against the interests of others. We have seen this in Britain in the last 15 years or so.

Successive Governments have pushed agendas riddled with phony contracts and businesses conducted in a manner that they have transformed the Government and Civil Service from a Public Duty into a mere business with contracts granted to family members or friends where the ones in job of the people are also in the check books of private and multinational organisations and what`s worse is that they defending this position which it is indefensible. The public Service is merely in the Job of the Public and National Interest . A Private Interest is far from the National Interest .

When Native British Population reached a terminal phase of their patience I see that their hope also started slimming down considerably . This is due to the lack of vision and real prospects for the working class people , not a rich millionaire party with advice about life from their point of view is needed for you , no is your voice and your initiative now . This is not a Political Statement because it is not Electoral , this is not a Promise it is the solution to end the current state of dissolution of our society.

This Manifesto is proposing a peaceful Revolution in Britain by means of Popular Movement to re-establish the formal Glory of the British Empire and prevent our country Britain and our cradle of Civilization, and Europe to be assimilated ,replaced, islamised, metis and mixed beyond recognition until its disappearance.

The proposed change is contemplating the replacement of our current Monarchy with a different Principle of Governance based on the virtue of Popular Movement of " People mere the People" and proclaiming a New Written Constitution of the country that would guarantee fundamental Citizens Rights and will be promulgated as the Fundamental Law of this country which holds basic fundamental rights and powers of the citizens

that would be deemed inalienable that no Government would be able to modify it or take it away from its citizens .

Only citizens can undo the Constitution by the same means they've raised this Constitution which are; The Act of Mass Referendum and Public demand with a bigger majority than the initial majority this Act has been adopted.

A new Institutional Monarchy will be installed as a historic continuation of tradition of political stability in Britain and moreover as a symbol of unity between all English native speakers across the world.

The Role of the New Monarchy and Head of State would be different, a shift from a purely ceremonial role to a different role a Constitutional one mandated by the People organised into the Constitutional Army of People which essentially is an ad-hoc organism with real legislative powers given by the Constitution.

The Head of State, in the future, will be sworn by the People Mandate in a formal ceremony and Sworn by the Church as the Monarch only after it has been accepted by the People and People Assembly.

The Role of Monarch would be limited only to the mandate that People will grant and the Constitution will allow.

The Monarch powers from now on is to hold accountable any elected Government and the Civil Service when you the People are asking this. It will be by Law as my main duty not as a person but as a New Institution created by you and for you, the People of England and Britain.

In the end of this I will say “This is my declaration that I sustain, I maintain and I sign”.

Sincerely Yours,
Daniel The First.
